WORK HISTORY	<p><b>Postdoctoral Fellow</b> June 2017 – Present <i>Oak Ridge National Laboratory</i> Reactor Physics Group <u>Description:</u> Working on the NEAMS Workbench to facilitate coupled physics simulations.</p> <p><b>Ph.D. Student</b> October 2013 – October 2016 <i>Commissariat à l'Énergie Atomique (CEA), Saclay, FRANCE</i> DEN/DM2S/SERMA/LTSD <u>Description:</u> To build a multiphysics framework within the APOLLO3 software package. The framework will use matrix-free methods and will support coupling between neutron transport and thermal hydraulics. Special attention was devoted to the treatment of homogenized cross sections in transient simulations.</p> <p><b>Graduate Research Assistant</b> August 2011 – August 2013 <i>Texas A&amp;M University, College Station, TX, USA</i> Department of Nuclear Engineering <u>Description:</u> To build a high fidelity model of coupled physics important to reactor analysis. The proposed method uses the mesh adaptive finite element method which can utilize the Deal.II FEM library written in C++. The physics modeled are two-group transient neutron diffusion and non-linear heat conduction.</p> <p><b>Summer Internship</b> May 2012 – August 2012 <i>Oak Ridge National Lab, Oak Ridge, TN, USA</i> Reactor and Nuclear Systems Division <u>Description:</u> Built a tool for the SCALE suite that evaluates how manufacturing tolerances impact the behavior of k-eff. This tool also handles the situation where parameters within a model are correlated and when possible correlations exist between different models. The tool was later incorporated in the SCALE 6.2 release.</p> <p><b>Reactor Operator/ Health Physicist</b> May 2009 – May 2011 <i>Nuclear Science Center, College Station, TX, USA</i> <u>Description:</u> A reactor operator ensures the safe operation of the reactor facility, and also performs necessary maintenance on the reactor (1MW TRIGA). A health physicist performs environmental surveys on the facility and conducts analysis experiments using the available reactor.</p>		
CERTIFICATIONS	<p>Senior Reactor Operator License November 2010 – December 2012 Reactor Operator License March 2010 – November 2010</p>

TECHNICAL  
SKILLS

- Programming Languages: C++, MATLAB, FORTRAN, PERL, PYTHON
- Modeling: Nuclear Reactor Transients, 2D Fluid Flows, Uncertainty Analysis
- Document Processing: L<sup>A</sup>T<sub>E</sub>X, Microsoft Word & Excel
- Nuclear Codes: APOLLO3, SCALE, MCNP
- Nuclear Experimentation: Neutron Activation Analysis, Gamma Spectroscopy, Instrument Calibration, Reactor Operation, Radioactive Material Packaging, Robotic Arm Manipulation, Environmental Surveying

## MISCELLANEOUS

- Studied French in Paris, France at the Sorbonne University for one month (JUN2010)
- Eagle Scout rank earned (APR2006)
- **Languages**: English (Native), French (Proficient)
- **Countries Visited**: Australia, Austria, Belgium, Czech Republic, France, Germany, Greece, Italy, Monaco, U.A.E.
